Class Description:

Introductory models for a startup business. Ideation, customer segments, value proposition, minimal viable product and market fit.

Explore the mindset of entrepreneurs while building on your own business idea by focusing on customer discovery. Experiences include ideation, shadowing business owners, network development, mentorship and customer/competitor observation and interviews.

Student Learning Outcomes:

- Understand and adapt the mindset of an entrepreneur.
- Define and discuss entrepreneurship as it relates to an idea unique to you. **SLO1***
- Problem identification and solution development. **SLO3***
- Shadow businesses and competitors that relate to your enterprise.
- Customer discovery through interviews and observation. **SLO4***
- Build a marketing plan to support a business idea. **SLO5***
- Begin the process of mentor development.

*Denotes departmental student learning outcomes
